REQUEST FOR CORRECTED NOTICE OF ALLOWANCE

Dear Sir/Madam:

On February 5, 2010 a Notice of Allowance and Fees Due was issued for the above-referenced patent application. We note that the title of the invention printed on the Notice of Allowance is incorrect.

In the Office Action dated August 26, 2009 the examiner required that the title of the invention be amended to become "clearly indicative of the invention to which the claims are directed."

The Amendment and Response filed on December 28, 2009 included a marked-up Specification which clearly showed the title had been amended to "ALL-OPTICAL INTENSITY TO DPSK CONVERTER. A clean copy of the Specification was also provided. The title printed on the Notice of Allowance is the original title and not the amended title.

We request a corrected Notice of Allowance be issued with the amended title ALL-OPTICAL INTENSITY TO DPSK CONVERTER. Copies of the pertinent pages of the August 26, 2009 Office Action and December 28, 2009 Amendment and Response as well as the February 5, 2010 Notice of Allowance are attached.

Respectfully submitted,

Dated: 26 FEB 10

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 12. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The abstract of the disclosure is objected to because it is not a single paragraph. Correction is required. See MPEP § 608.01(b).

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: All-Optical Intensity to DPSK Converter.

ALL-OPTICAL CONVERTER

ALL-OPTICAL INTENSITY TO DPSK CONVERTER

CROSS-REFERENCE TO RELATED APPLICATION

The present application is a national stage of and claims priority
5 of International Patent Application Serial No. PCT/FR2003/03809, filed
December 19, 2003, the content of which is hereby incorporated by reference in its
entirety.

BACKGROUND OF THE INVENTION

The invention concerns an all-optical converter for converting an intensity-modulated optical signal into an optical signal modulated to the DPSK format. It
10 finds an application in the field of optical transmissions.

Intensity modulation by On/Off Keying or OOK is known. In this case, a pulse represents a "1" and an absence of pulse represents a "0".

Differential phase shift modulation (Differential Phase Shift Keying or
15 DPSK) is known. In the DPSK format, the information is transported in the phase difference between two adjacent pulses.

Transmission to the DPSK format is advantageous since the sensitivity is better. In addition in optical mode, it is easy to analyse the phase difference between two signals.

20 There currently exist, in the field of optical transmissions, converters that convert an amplitude-coded binary electrical signal into an optical signal coded to the DPSK format. These converters combine electronic elements and optical elements.

25 The electronic part of the converter comprises an exclusive-OR (XOR) electronic logic gate. The electronic signal that represents the information arrives modulated in amplitude at the first input of the logic gate. The output of the logic gate is connected to the second input of the logic gate with a delay of one bit time with respect to the first input.
